List of data journals

 Kindling, Maxi;  Strecker, Dorothea

This document describes a dataset that aggregates information about 135 data journals.

Data journals focus on the publication of data papers – a specialized publication type describing datasets, their collection and reuse potential that is peer-reviewed, citable and indexed.

This dataset includes a comprehensive list of data journals that was compiled by aggregating existing sources, as well as an overview of these sources.

The list is continually updated on GitHub, where additional information on data journals (URLs of data journal homepages) is provided: <https://github.com/MaxiKi/data-journals>

About

This talk was produced using Quarto. Rick Gilmore used the RStudio Integrated Development Environment (IDE). Bruce Desmarais used XXX.

The source files are in R and R Markdown, then rendered to PDF slides in the beamer format. The PDF slides are hosted in a GitHub repo.
